HORTICULTURE AND LANDSCAPING COMMITTEE REPORT 2016-17

The horticulture committee ventured to work steadily and tirelessly to keep the college premises green and beautiful. In this session we added Neem trees along with Bottle –bush, Amla, Harshringar and Haldi. Apart From adding trees the seasonal Plantation of flower carried on throughout the year. Bougainvillea, Marigold, Chrysanthemum, Palms, Kochia, Cosmos, Caldarium etc were planted in July and August. In October, Rose, Dianthus, Dahlia, Flex, Lemon grass plants were also added in nursery. The maalis carried on with the usual practice of making seeds for future plantation and preserving bulbs of plants. Many new flower beds were created . Stunted plants were added to the beauty of our lawns.

The session was particularly rewarded due to the over welcoming response to different varieties of Chrysanthemum flowers nurtured by our diligent and talented maalis. The college won the third prize in the Chrysanthemum show organized by the Chandigarh Administration. A beautiful landscape with plants which needed less sunlight was planted in Art Block Lawn.
