- **Pest control fumigation drive**

As a part of cleanliness drive, the medical committee also got conducted Pest Control drive from certified pest control company, J.S.Pest Control LTD on 18th Aug, 2018. The services included the general pest control, fogging services and antilarval treatment in places having stagnant water. The drive was actually a preventive measure against outbreak of dengue, malaria and other dreadful diseases. Fogging for control of adult mosquitoes in the outdoor area and anti Larva treatment in stagnating water bodies included desert coolers was done in entire college including hostels.

- **Cleaning of water tanks**

The cleaning of all the water tanks in the college and hostel campus was done on 7th July, 2018.the contract for the above-mentioned work was given to the Chandigarh based crystal clean company. They followed a German based seven step technology for the same which includes

1. **Cleaning Of Surrounding.** We clean the outer area of tank with pressure water machine to remove the dirt, spider webs etc.
2. **Dewatering.** We empty the water of the tank with submersible pump.
3. **High Pressure Cleaning.** Jet washer machine is used to clean the inner walls of the tanks.

4. **Sludge Removal** All the dirt / sludge to be removed not through the pipes but with sludge removal machine.
5. **Vacuum Cleaning.** Vacuum cleaner machine is used to remove the remaining dirt particles.
6. **Anti-Bacterial Sprays.** Anti bacterial spray (H₂O₂) is used to kill the harmful bacteria and to slow down the growth of bacteria.
7. **Ultra Violet Treatment.** Ultra Violet lights are used to kill the unseen harmful bacteria.

- **Anti- malaria, Anti- dengue and cleanliness drives in hostel**

As the college caters to many needs of thousands of students in the hostel, the health and hygiene of the students is of utmost importance. Keeping this in mind, the cleaning of water coolers in the college along with the spraying of insect repellents in the college is done at regular intervals in the months when we all are prone to such infections. Moreover, the Saturdays of the week are observed as the dry days. A proper record of these activities is duly maintained in registers by the wardens of the hostels
